

## Department of Computer science

**BSCS: 5<sup>th</sup> Semester**

**Mid Term**

**Time: 1:15 Minutes**

1. Given the provided screenshot of an app interface, your task is to create a similar UI using Dart within the Flutter framework.
2. Please write Dart code in Flutter to reproduce the app's interface seen in the provided screenshot. Ensure that the layout, styling, and components align with the depicted design.
3. Feel free to use the necessary Flutter widgets, layouts, animation and design principles to recreate the UI. This exercise will assess your proficiency in working with Flutter to implement complex user interfaces and components.
4. Once completed, share your Dart code to demonstrate your ability to replicate the app interface using Flutter's framework.
5. Submit your code on GitHub as Mid Term
